**SINCERE
SEASON
GREETINGS
To All
THE CONNEAUT CAN CO.
CONNEAUT, OHIO**

• her life is in her hands...and yours

This wonderful little girl, named Colleen, is a victim of Myasthenia Gravis, commonly called MG. Without the medication she holds in her hands her affliction could be fatal. With it, she is normal.

Most frequent symptoms are extreme fatigue, drooping eyelids, double vision, difficulty in swallowing, weakness of arms or legs. See your doctor at once! Most patients, adults or children, are restored to happy and nearly normal lives.

Will you support the work to find the cause and cure of MG? The big difference of life itself may be in your hands, too.

THE MYASTHENIA
GRAVIS FOUNDATION, INC.

155 East 23rd St., New York 10, N.Y.
